## LATAM Airlines Group S.A (LATAM)

Update following upgrade to B1 with a stable outlook

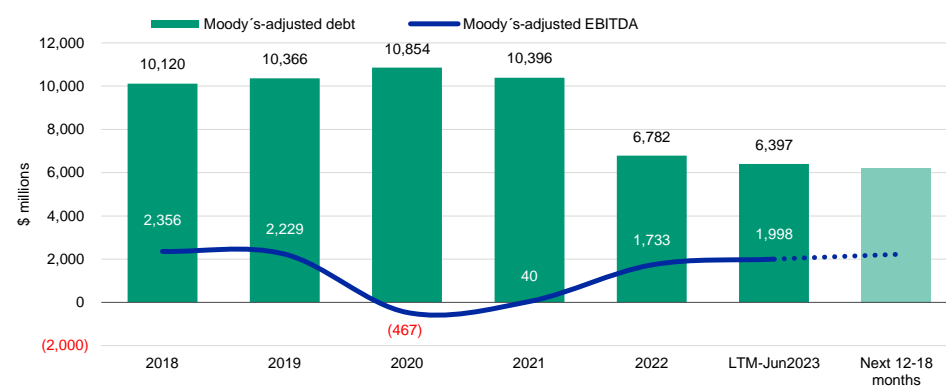

### Summary

[LATAM Airlines Group S.A \(LATAM\)](#)'s B1 rating reflects the company's scale and superior network connectivity, which translate into leading positions in the five domestic markets in which it operates and in intraregional flights in Latin America as of June 2023. The rating also reflects its well-diversified business portfolio of air transportation services and strategic alliances. The rating is also supported by LATAM's improved post-bankruptcy capital and cost structures, and adequate liquidity, which will allow the company to weather the volatile recovery of the industry.

The rating is constrained by LATAM's exposure to the volatility of the airlines industry, rising macroeconomic risks and increasing costs. LATAM will have to contend with higher costs derived from labor (denominated in local currencies), fuel and other US dollar-denominated inputs, which can hamper profitability despite firm demand and capacity discipline in its key markets.

Exhibit 1

#### LATAM improved its cost and capital structures, and EBITDA is recovering after bankruptcy Moody's-adjusted debt and EBITDA

Sources: Moody's Financial Metrics™ and Moody's Investors Service

## Credit strengths

- » Leading market position in domestic markets, intraregional flights in Latin America and in South America-North America and South America-APAC routes
- » Variable cost structure, which provides flexibility through recovery
- » Positive outlook for air travel in the region after the coronavirus pandemic-induced slump, which supports the recovery in revenue passenger kilometers (RPK)
- » Improved capital structure after bankruptcy
- » Good post-bankruptcy liquidity

## Credit challenges

- » Exposure to the volatility of the airline industry
- » Rising macroeconomic risks and increasing costs, which could hurt credit metrics

## Rating outlook

The stable rating outlook reflects our expectation that LATAM's credit metrics and liquidity will remain stable in the next 12-18 months, and that the company will maintain its conservative approach toward liquidity, costs and capacity management.

## Factors that could lead to an upgrade

An upgrade of LATAM's rating would require longer-term visibility into the company's post-Chapter 11 recovery or strengthened credit metrics that provide a buffer for its credit quality under various stress scenarios. Quantitatively, an upgrade would require:

- » Moody's-adjusted leverage (measured by total debt/EBITDA) below 4.5x on a sustained basis, and
- » interest coverage (measured by funds from operations [FFO] + interest expense/interest expense) above 4x on a sustained basis.

A rating upgrade would also require adequate liquidity on a sustained basis.

## Factors that could lead to a downgrade

We could downgrade the rating if the recovery of LATAM's credit metrics lag our expectations, with:

- » adjusted leverage above 5.5x, and
- » interest coverage below 1x.

A deterioration in the company's liquidity, or additional shocks to demand or profitability that lead to cash burn could also result in a rating downgrade.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody's.com> for the most updated credit rating action information and rating history.

## Profile

LATAM Airlines Group S.A (LATAM) is a Chile-based airline holding company formed by the business combination of LAN Airlines S.A. of Chile and TAM S.A. (TAM) of Brazil in June 2012. The company has domestic operations in Brazil, Chile, Peru, Ecuador and Colombia, and provides intraregional and international passenger services, in addition to cargo operations and a frequent flyer program. In the 12 months that ended June 2023, LATAM generated \$10.7 billion in net revenue.

Source: Company's financials

## Detailed credit considerations

### Good business profile and leadership position in Latin America

LATAM is the largest airline group in South America, with a local presence for domestic passenger services in five countries (Brazil, Chile, Peru, Ecuador and Colombia). The company also provides intraregional and international passenger services; has cargo operations that are carried out using belly space on passenger flights and a dedicated freighter service; and offers Latam Pass, the largest frequent flyer program in the region and seventh largest in the world in terms of the number of members. LATAM serves passengers in around 143 destinations in 25 different countries and provides cargo services to 156 destinations in 24 countries. As of the end of June 2023, the company had a fleet of 311 aircraft and a set of bilateral alliances.

The company's scale and superior network connectivity translate into leading positions in the five domestic markets in which it operates and in intraregional flights in Latin America as of June 2023. Also, the company has a well-diversified business portfolio of air transportation services and strategic alliances. LATAM's unique network connectivity, combined with capacity discipline in all its main

markets in Latin America, provides it with strong pricing power in the current environment, and has allowed the company to preserve its profitability by passing through rising costs, namely those of jet fuel, to airfares.

### Improved post-bankruptcy cost and capital structure

The changes to LATAM's cost and capital structure, as part of its reorganization plan, allowed it to achieve a fast recovery in credit metrics through 2023. The company restructured its cost base, simplified its fleet (by reducing its operating fleet, withdrawing the A350 aircraft and consolidating the Brazilian wide-body operations in the B777 and B787 aircraft), increased the share of variable costs (to about 80% of total costs through 2023), outsourced non-core activities and renegotiated more than 1,000 contracts, most of which do not contain step-up or termination clauses, making the improvements sustainable. Such initiatives led to a total reduction of about \$1 billion in LATAM's annual operating costs and will allow for faster responses to volatility in demand and cash preservation. LATAM's CASK ex-fuel was \$4.7 cents in the first half of 2023 (\$4.1 cents excluding cargo operations), stable relative to 2019 levels, illustrating LATAM's cost-driven management despite the inflationary pressures faced by the region in the last two years. LATAM's CASK ex-fuel, excluding its cargo operations, of \$4.5 cents in 2019 already compared favorably with that of regional and international low-cost and network carriers. LATAM intends to pursue further cost-cutting initiatives to preserve its profitability.

As part of its restructuring process, LATAM has also exited non-profitable markets such as domestic Argentina and is focusing on developing a new domestic hub in Fortaleza, Brazil, while expanding its presence in previously established hubs such as São Paulo, Santiago and Lima. The company intends to maintain its capacity discipline, preserving its profitability while defending its competitive position, and continue to increase its cargo operations efficiently.

LATAM's post-exit capital structure also improved, with total debt declining to around \$6.4 billion as of the end of June 2023 from \$11.6 billion as of September 2022, mainly reflecting the conversion of debt into equity. LATAM's total debt comprises \$3.7 billion in fleet debt; \$2.25 billion in new debt through a combination of term loans and notes; and about \$500 million in other debt instruments. The company also raised \$800 million through a new equity offering and \$4.6 billion of new funds from the issuance of convertible notes. It has \$1.1 billion in fully undrawn revolving credit facilities (RCFs).

### Positive outlook for the airlines industry tempered by rising macroeconomic risks and increasing costs

Our outlook for the global airlines industry remains positive as its recovery from the effects of the pandemic has room to run. In Latin America, demand for air travel continues to grow, and carriers will benefit from a more rational and consolidated market to keep airfares high. There is no labor shortage in the region, and little fuel hedging will support Latin American carriers' profitability if jet fuel prices decline. Also, in a recession, demand would decline, but so would the price of oil. The biggest risk to the industry would be a scenario where oil prices increase during a recession or if demand weakens.

The extensive rollout of the coronavirus vaccine in the region, and the reopening of all domestic markets, and international markets such as Argentina, the Caribbean and the US, supported a substantial increase in forward bookings for LATAM. These factors also translated into more passenger revenue and number of flights through 2023 — even as rising macroeconomic risks in the region threaten disposable income and consumer confidence. So far, air travel demand has remained robust in the region even amid stagnant economic growth and declining disposable income. LATAM's total RPK recovered to 96% of the 2019 level as of August 2023, with Brazil and Spanish-speaking countries' RPK at 114% and 94% of pre-pandemic levels, respectively, and the international RPK still lagging behind at 88%. LATAM's reorganization plan generated significant cost savings, which will support future profitability and cash generation even amid the volatility in passenger demand.

The consolidation of the industry and little room in balance sheets for aggressive commercial strategies in the Latin American aviation market will result in more rational competition and capacity, ultimately supporting higher airfares and the stronger profitability of all carriers in the region. The improved competitive dynamics and ability to pass through costs while catering to pent-up post-lockdown demand will preserve airlines' profitability and cash generation in the region. In 2022, [Gol Linhas Aereas Inteligentes S.A.'s](#) (Gol, Caa2 negative) and [Avianca Group International Limited's](#) (Avianca, B3 stable) shareholders announced a business combination of their stakes in the carriers, which will help rationalize intraregional competition. This deal adds to several transactions in Latin America since 2019 that have already translated into more rational competition in the region. In 2019, Avianca Brasil ceased operations in the Brazilian domestic market, improving the competitive landscape and allowing for higher fares on domestic routes for LATAM, Gol and [Azul S.A.](#) (Caa1 positive). In 2020, LATAM, Avianca and [Grupo Aeromexico S.A.B. de C.V.](#) (Aeromexico, B3 stable) filed for bankruptcy because of the adverse effects of the pandemic on their operations. The three carriers' post-bankruptcy plans include strict

network and cash generation management, which will preserve the competitive landscape in their markets. For example, LATAM left the Argentine domestic market as part of its restructuring plan, and the Mexican low-cost carrier Interjet ceased domestic operations, improving competitive dynamics for the remaining operators in Mexico, which we expect to continue even if Interjet resumes service. The Colombian low-cost carrier Viva was liquidated and ceased operations in Colombia, which has improved the competitive dynamics in Colombia's domestic market as well.

With the continued demand recovery and after the implementation of all initiatives and the downsizing of financial and operating costs, LATAM's operating performance was stronger than expected. The company will outperform its business plan in 2023. The company's better-than-expected operating and financial performance during 2023 allowed it to strengthen its credit metrics and liquidity. LATAM's Moody's-adjusted EBIT margin recovered to 10% in H1 2023, compared with 7.5% in 2019, and adjusted leverage declined to 3.2x, already below the pre-pandemic levels of 4.7x. Interest coverage — measured as Moody's-adjusted FFO + interest expense/interest expense — improved to 3.0x for the 12 months ended in June 2023, and we expect the ratio to stabilize at this level in 2024. We expect LATAM's leverage to remain at 2.5x-3.0x and its cash position to amount to 15%-20% of revenues in the next two years, which provide a buffer for the company's credit quality even under stress scenarios. LATAM's strong operating performance and strengthened credit metrics reflect sustained improvements in the company's cost and capital structures, which provide LATAM with the flexibility to withstand the volatility in market conditions.

### Exposure to currency volatility

The US dollar is LATAM's functional currency for the pricing of most of its products, the composition of its balance sheet and the effects on its operating results. However, the company is exposed to foreign-currency volatility to the extent that its revenue is higher or lower than its expenses in a foreign currency and that its assets are higher or lower than its liabilities in currencies different from an entities' functional currency. The company is primarily exposed to the Brazilian real and the Chilean peso, which have been experiencing significant volatility. To mitigate its balance-sheet exposure to foreign-currency volatility, LATAM has been working to reduce its balance-sheet mismatch. The company's exposure to the US dollar in TAM's balance sheet has decreased significantly since 2012, mainly through the transfer of aircraft, debt and other US liabilities to LATAM's balance sheet. Additionally, the company uses derivative hedging strategies that involve hedging monthly cash flow with foreign-currency forwards and derivative options instruments. LATAM's finance committee meets on a monthly basis to discuss the company's risk management policy.

## ESG considerations

### LATAM Airlines Group S.A (LATAM)'s ESG Credit Impact Score is Moderately Negative CIS-3

Exhibit 8

#### ESG Credit Impact Score

# CIS-3

## Moderately Negative

For an issuer scored CIS-3 (Moderately Negative), its ESG attributes are overall considered as having a limited impact on the current rating, with greater potential for future negative impact over time. The negative influence of the overall ESG attributes on the rating is more pronounced compared to an issuer scored CIS-2.

Source: Moody's Investors Service

**CIS-3.** LATAM's CIS-3 indicates that ESG considerations have a limited impact on the current credit rating with potential for greater negative impact over time. This reflects limited credit impact to date, but the potential for carbon transition and related social risk factors to pressure the rating over time. That said, given that current technologies do not support a rapid carbon transition scenario for airlines and there are limited substitutes in most markets, the credit risk to most airlines is long-term in nature. Governance risks are incorporated in the rating and mainly relate to the recent bankruptcy process, the existence of dual class of shares within the corporate structure and somewhat complex organizational structure derived from previous limitations on foreign ownership for Brazilian airlines, balanced by its board independence and track record of adequate financial management.

Exhibit 9

#### ESG Issuer Profile Scores

ENVIRONMENTAL

# E-4

## Highly Negative

SOCIAL

# S-4

## Highly Negative

GOVERNANCE

# G-3

## Moderately Negative

Source: Moody's Investors Service

### Environmental

**E-4.** LATAM faces environmental risk due to carbon transition. This will primarily depend on the evolving global decarbonization policies and regulations, which may increase operating costs for airlines. Further, the desire to reduce carbon emissions may lead to reduced travel, in particular for business purposes, much of which can effectively be done virtually, as demonstrated during the pandemic.

### Social

**S-4.** LATAM faces industrywide social risks related to demographic and societal policies for reducing carbon emissions.

### Governance

**G-3.** LATAM's governance risks are incorporated in the rating and mainly relate to the recent bankruptcy process, the existence of dual class of shares within the corporate structure and somewhat complex organizational structure derived from previous limitations on foreign ownership for Brazilian airlines, balanced by its board independence and track record of adequate financial management. LATAM remains a publicly held company after exiting Chapter 11, with shares traded on the Santiago stock exchange. About 66% of the company's shares are held by creditors and the remaining 34% are held by existing shareholders supporting the restructuring

plan, including the Cueto Group, Delta Air Lines Inc. (Baa3 stable) and Qatar Airways. The creditors group appoint five out of nine board members, and the remaining four are appointed by the other shareholders. The company's pre-existing governance practices will remain unchanged following the Chapter 11, but board approval requirements for certain matters will temporarily increase.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moody's.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

### Liquidity analysis

LATAM has a good liquidity profile with \$1.7 billion in cash and \$1.5 billion in debt maturing until year-end 2024. The company's cash balance covers short-term financial debt maturities of \$534 million by 3.2x. The company's debt amortization schedule is comfortable, with most of the upcoming maturities represented by the exit financing, namely the term loans and notes, due beyond 2026. The company also has two secured undrawn RCFs amounting to \$1.1 billion, and it generated \$352 million of free cash flow (FCF) in H1 2023.

The company's cash generation benefits from a reduction of about 40% in annual fleet cash costs from 2019 levels following the renegotiation of the fleet contracts done during CH11. Also, the company continues to have flexibility in terms of fleet capital spending. We expect LATAM to generate about \$1.7 billion in cash flow from operations annually, which is sufficient to cover annual capital spending needs by about 1.0x-1.5x, including fleet renewal and expansion. We also expect neutral-to-positive FCF from 2023, reflecting flexibility in maintenance capital spending and costs. Finally, we expect LATAM to proactively pursue liability management initiatives to further lengthen its debt tenor and reduce funding costs. The company also has other potential liquidity sources, including unencumbered assets that could be used in potential secured financing transactions.

LATAM also has financial covenants under part of its credit facilities based on the asset coverage ratio, which should not be less than 1.6x (measured on a semiannual basis), as well as consolidated liquidity of not less than \$750 million as of the close of each business day.

### Structural considerations

LATAM's debt mainly comprises secured debt instruments, except the \$172 million local bonds that are unsecured and subordinated to the rest of the financial debt, with collaterals represented by aircraft in the case of leases and fleet debt; engines, components and aircraft in the case of the RCFs; and intangible assets — such as intellectual properties, brand, routes and slots, cargo business, and other assets — in the case of term loans and secured notes. All debt, except the local bonds, rank *pari passu*, and there is no notching of debt instruments relative to the corporate family rating.

## Methodology and scorecard

LATAM's scorecard-indicated outcome under our [Passenger Airlines](#) rating methodology maps to a Ba2 rating for the 12 months that ended 30 June 2023, two notches above the current assigned rating. The scorecard-indicated outcome reflects the improvement across all quantitative subfactors stemming from a recovery in operating performance, LATAM's improved capital structure after bankruptcy and the correlated impact on the issuer's credit metrics, while the assigned rating is constrained by the lack of track record after the bankruptcy and the company's exposure to the volatility of the airline industry. Our 12-18-month forward view maps to a Ba1 rating.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the credit rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody's.com](http://www.moody's.com) under the heading "Investor Relations — Corporate Governance — Charter Documents - Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
